

Marinefloor

modular pontoon

Floating Platforms MARINEFLOOR®

Looking for a solution to extend space on the water? Whether your need is technical, practical or simply for fun, our team quickly install a modular floating platform based on your needs! Work platform, catering terrace, concert stage, sports field, synthetic ice rink, ...

From a few square meters to several thousand, we provide platforms that can accommodate public, securely (guardrails, lifeline boxes, ladders, ...), equipped and set-up for any circumstances (floor coverage, various structures tailor made, ...). We provide anchoring and mooring. Our structures are accessible to persons with reduced mobility.

On request, we equip them with our other solutions.

Public safety

Available for renting

Quick & easy to install & use

Focus points

- Optimal safety due to its stability, its buoyancy, its finish non-slip and its specific equipment (guardrail, lifeline boxes, ladders, ...)
- Suitable for public use due to its flotation capacity
- Extreme flexibility allowing to follow swell movements
- Easy to install, dismantle, transport, store, ... without any special equipment
- Modular and extendable system for a perfect adaptation
- Withstands harsh conditions, even at sea
- Can be dismantled in a few hours in case of flooding

Our modular floating gateways adjust to the tidal range and let pass the majority of jams (due to a low draught, our end products are unaltered by the current). As a result, it constitutes an effective solution for all types of events, whether professional, sports related, cultural, private ... Our team offer sophisticated floating terraces for hotel, restaurant, bar, ... but can also make life easier for construction teams and many professionals. Available for renting from a couple of days, it enable the craziest projects to offer a moment on the water. Also available for purchase, our products allow you to extend over the water in a sustainable way.

Détails techniques du cube Ecosystem®:

- Dimensions : 50 cm x 50 cm x 40 cm (4 cubes = 1 m²)
- Poids : 6,5 kg/pièce (26 kg/m²)
- Flottabilité : 90 kg/pièce (360 kg/m²)
- Résistance à l'arrachement des oreilles : jusqu'à 2 t
- Densité : 948 kg/m³ (test ISO 1183)
- Haute résistance mécanique (chocs et impacts environnementaux)
- Traitement anti-UV & antistatique
- Retardement au feu et résistance au gel
- Couleurs standards : beige et gris clair

Use :

Cultural and/or sports events, concert or other performance on the water, sports or leisure fields ... Ceremonies and private/professional events ... Bar/restaurant terraces ... Pyrotechnics, work platform (ports, works inspections, ...), ...
