

Marinefloor

modular pontoon

Your floating project partner

Located in the heart of Europe, Marinefloor SAS was created in 2006 by Laurent DUBOIS. With over 18 years experience in design and manufacture of plastic products, he launched the concept of modular floating pontoon on the European market with a French production, aware of its global interest for various activity sectors, well beyond the port environment.

For more than 10 years, Marinefloor has been expending its solutions for sale and rental in a wide range of sectors: port, lake, river and tourist applications, events of all sizes and durations, security, construction, military sector, ...

MarineFloor always has a solution to support you !

FRENCH FLOATING MODULAR PONTOON PRODUCER SINCE 2006

Focus Points

- French company, from development to production
- A multidisciplinary team available and responsive to take up all challenges with you.
- Eco-System® cubes that are both light and very strong, with a buoyancy capacity of 360 kg/m² to almost one ton, with a patent on the final rigidity of the deployed structures.
- High quality production. Each element is tested and guaranteed for 10 years.
- Constant Research & Development for more and more adapted services.

«The Marinefloor system is by far the most efficient in terms of cost, speed of execution, modularity while offering maximum safety, stability and unmatched ease of use.

Many tests were done for crowd motions on a 15m x 15m basis and they were very surprising. More than 300 people moved from left to right and from front to back at the same time. At no time did the base experience a rise in water and did not sag on one side.

Opt for the safety of your users and for a sustainable purchase by choosing our solution, pioneer in modular floating pontoons solutions. »

And you,
